

Packaging specifications

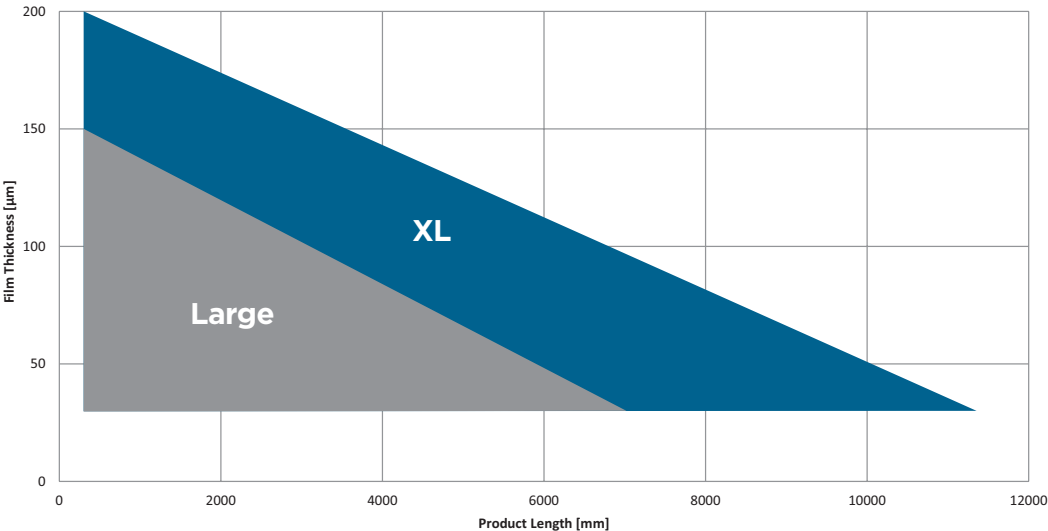

This is a guide to specify which machine type that fits your products and requirements. The final specification must be based on an assessment done by Tentoma.

Dimension vs machine type

*) For long products the height will decrease

Film thickness vs product length*)

The figure shows the maximum achievable product length and the film thickness with that specific machine.

*) Settings:
 Product height 600 mm
 Product width 600 mm
 Film stretch on product 20%
